BIOACTIL

[Buy Now](#)

Bioactil is a Topical Analgesic Gel for muscles, ligaments and joints.

Bioactil is able to penetrate deep into the tissue, safely promotes and accelerates the body's ability to heal itself, very effective for a wide variety of muscle, ligament and joint injuries.

Bioactil accelerates the healing of new injuries and provide relief to old, deep pains. It is biocompatible with the human body, combining the best of medical technology with biogenic science. The simplicity of the formula provides a treatment that can be used safely and repeatedly without concern about side effects. Steriod free. Bioactil creates a healthy cellular micro-environment and actually assists cell regeneration and cell reproduction. Below the surface, Bioactil penetrates to help restore health to muscles, ligaments, tendons, connective layers and even bones.

Instruction

For muscle and joint pain: Apply to affected area 3 to 4 times daily. Rub gently until dry. May be used 5 to 6 times daily for acute pain. Before exercise or hard work: To maximize performance, apply to calves, thighs or other muscles to be exercised or used strenuously. Wait 5 minutes before beginning exercise.
