Periactil Precondition kit

[Buy Now](#)

Periactil Preconditional Kit is not just tooth paste. It is a special kit designed to help to maintain a healthy mouth, but also a healthy heart and brain.

Periactil Gel and Precondition carry xylitol in a proprietary and special manner, allowing superior action on teeth and gums. This is the most advanced method for delivery and utilization of xylitol as a tooth and gum protective agent and offers far more protection than xylitol toothpastes. Small cavities are inhibited from growing; the formation of new cavities is dramatically reduced; gum disease is reversed and prevented. Gums are strengthened. Soothes mouth sores. Reduces gum swelling and redness. Stops bleeding gums. Eases and cures canker sores, mouth ulcers. Excellent for postal dental treatment healing.

EXTREME Cavity Fighting and Gum Disease Reversal and Prevention – Advanced Xylitol Treatment – Fluoride Free

The red tube will do deep cleaning for your teeth and gums so that Periactil can work more effectively.

The green tube, Periactil, reconditions your gum, fights all gum diseases and fights tooth cavities.

Benefits for a healthy heart and brain.

Product Description

Periactil Gel and Precondition carry xylitol in a proprietary and special manner, allowing superior action on teeth and gums. This is the most advanced method for delivery and utilization of xylitol as a tooth and gum protective agent and offers far more protection than xylitol toothpastes. Small cavities are inhibited from growing; the formation of new cavities is dramatically reduced; gum disease is reversed and prevented. Gums are strengthened. Soothes mouth sores. Reduces gum swelling and redness. Stops bleeding gums. Eases and cures canker sores, mouth ulcers. Excellent for postal dental treatment healing. Fluoride-free.

How to use Precondition kit effectively

1. Before you go to bed *(very important)*, brush your teeth with your favorite toothpaste without something, rinse, then use about the same amount from the red tube of the Precondition Kit to brush your teeth and rinse again. Then you can squeeze about half of an inch or one centimeter of Periactil onto your tongue, and apply to the teeth and gum by licking around your gums and teeth. Swallow the remainder of the Periactil within your mouth. * (very important)*
2. In the morning brush your teeth with your favorite toothpaste, rinse. Using the red tube in the morning is optional. Then you can squeeze about half of an inch or one centimeter of Periactil onto your tongue, and apply to the teeth and gum by licking around your gums and teeth. Swallow the remainder of the Periactil within your mouth. * (very important)*.
3. Carry Periactil with you wherever you go, after each meal or eating something, just rinse you month with

water, then apply Periactil the usual way. You can apply it whenever you want, just like chewing gum.
